## **ClevX™ releases its [DataMouse™](#) Technology for licensing, a mouse containing secure storage**

**Kirkland**, WA, January 26, 2008 – ClevX, a technology development and licensing company, has released the [DataMouse](#) (patent pending) that embodies DataLock technology for secure storage in a mouse.

“Users have numerous storage solutions for backup applications. A large percentage prefer to have storage that is not only secure, but easy to use,” said Lev Bolotin, Founder & CEO of ClevX. “since your [DataMouse](#) is always connected, a backup application can monitor changes on your computer for immediate backup.” Requiring only one USB port, [DataMouse](#) reduces the number of gadgets and leaves more ports free.

### **Availability of ClevX’s Technology**

ClevX currently licenses [DataMouse](#) and other technologies in its portfolio to companies looking for innovative products that differentiate and provide an “edge” over the competition. Visit [www.clevx.com](http://www.clevx.com) for more information.

### **About ClevX**

ClevX is a technology leader and innovator in expanding markets. ClevX’s patented solutions target large and rapidly growing markets with applications related to personal computing and mobile professionals.
